

*Masks, filters, or suction tubes alone can't protect enough.*

Protection for patients, doctors, and dental assistants

**Don't Breathe Airborne Dangers**  
**Mercury, Bacteria, Virus infected**  
**micro-organisms, Volatile Organic**  
**Compounds**

Provide extra protection for sensitive  
pre-natal or immune compromised

Our technology stops pathogens and eliminates gases that small vacuum tubes, HEPA filters, and carbon filters can't. We help capture what gets airborne from high-speed tools.

## Unrivaled Effectiveness

Patent pending technology uses the electrical nature of all life to remove airborne contaminants better than mechanical systems. **Tests by independent EPA/FDA labs show more than 99.99994% bacteria were killed** - including listeria monocytogenes, bacillus thuringensis, staphylococcus aureus, and E-coli. **Microbes are dead almost instantly.**

Independent testing has proven the ability of this unique technology to **remove mercury vapor from the air.**

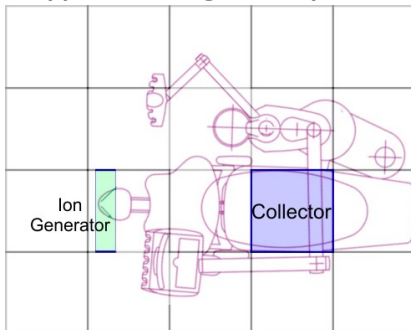

### Power, Protection, Value

- Captures mercury vapor & elemental metals
- Breaks down volatile organic compounds
- Collects particles sized 1000 to .001 microns
- Kills bacteria, mold spores, and virus infected microorganisms on contact
- Removes all organic odors
- No ozone created
- No harmful EMI / RFI generated
- Always on, continuously cleaning air
- Silent, no loud fan noise
- Lower cost to buy and use

### Install in Any Ceiling

- Drop Ceiling – Standard 2'x2' or 2'x4'
- Adapters for Non-Standard Sizes
- Smooth & Vaulted Ceilings
- Open Beam / Exposed Utilities
- Using quality, USA made ICW Mounts

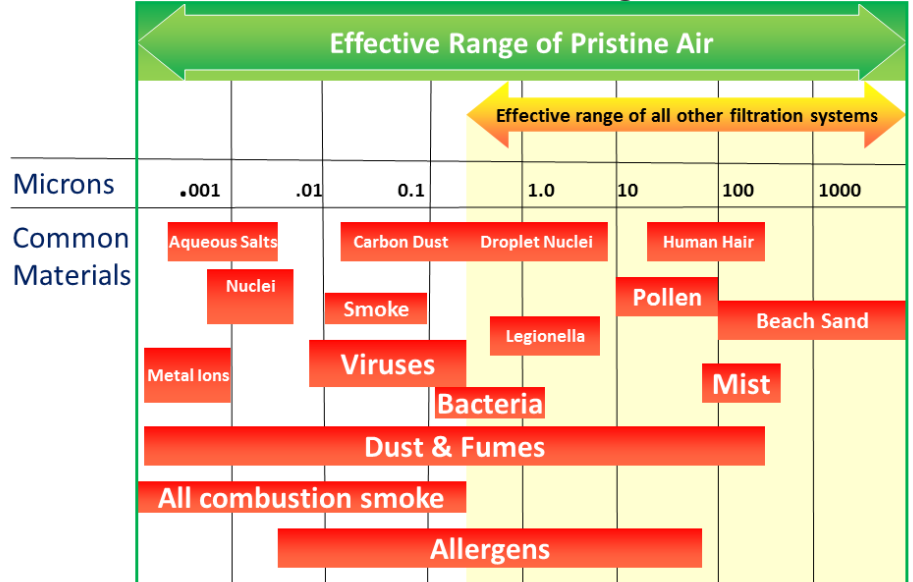

#### Typical Ceiling Tile Layout

### Technical Specifications

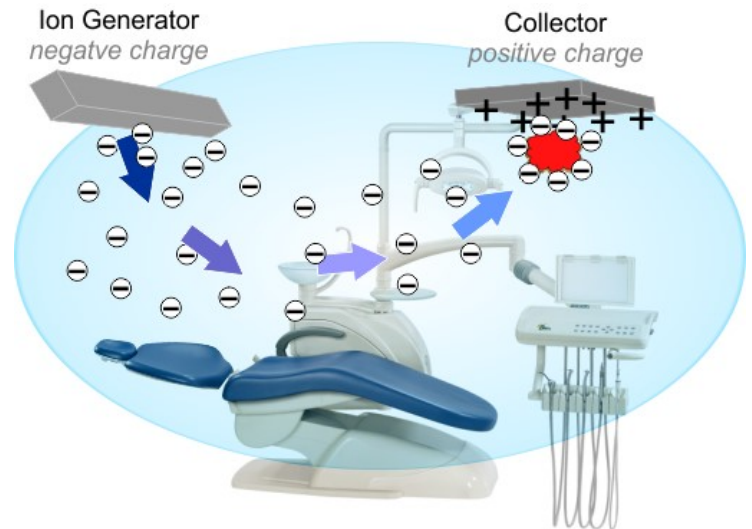

Input Power	100-120V, 50/60 Hz
Consumption	5W
Particle Range	1000 to .001 microns
Ozone	None
EMI / RFI	Negligible
Warranty	5 Years

### Smallest Particles are Dangerous

### Electrical Attraction
